Cloud services on NetApp HCI overview

NetApp HCI installations connect to, register with, and become a deployable region with NetApp Cloud Central.

What you can do with cloud services on NetApp HCI

- Deploy services across cloud providers and your private cloud.
- Interact with NetApp HCI as you would with any other supported cloud provider.
- Port the apps and data across a hybrid cloud architecture regardless of cloud location without compromising service-level agreements.
- Spin up cloud-native applications yourself. See Adding applications to your Kubernetes cluster using the NetApp Kubernetes Service.
- Create cloud volumes on the Kubernetes cluster by using the NetApp Fabric Orchestrator. See Managing Cloud Volumes on NetApp HCI overview information.
