Access NetApp Kubernetes Service	1
Steps	1

Access NetApp Kubernetes Service

You can access NetApp Kubernetes Service directly with its own address or by selecting the product option from the Cloud Central product list.

Steps

1. Go to the [NetApp Kubernetes Service](#) Login page.
2. Enter your Cloud Central login credentials and click **Login**.

If you do not see any systems listed, make sure that the NetApp HCI administrator is added to your NetApp Cloud Central account.

3. If you do not have a Cloud Central account, on the Cloud Central Login page, click **Sign Up**.
4. Using Cloud Central, you can set up accounts either as individual accounts or as Federated accounts:
 - a. You can make a new account with name, email, and password and then you will be logged in. This is the simplest type of account.
 - b. If you are part of a Cloud Central Federated organization, you enter your email and are then routed to the organization login.
5. From other Cloud Central products, select **Products > NetApp Kubernetes Service**.
