# View storage and compute resources on the HCC Dashboard

With the NetApp Hybrid Control (HCC) Dashboard, you can view all your storage and compute resources at a glance.

Only compute nodes that are managed and clusters with at least one managed node in H-series hardware appear on the Dashboard.

## Steps

1. Open a web browser and browse to the IP address of the management node. For example:

```
https://[management node IP address]
```

2. Log in to NetApp Hybrid Cloud Control by providing the NetApp HCI storage cluster administrator credentials.
3. View the Dashboard:
  - **Storage:** Displays the number of storage clusters, storage nodes, and total volumes.
  - **Compute:** Displays the number of compute clusters and total compute nodes.
  - **Storage Capacity:** Displays the total physical storage space available in your cluster on the **RAW** tab, and information about the provisioned storage on the **EFFECTIVE** tab.

To view cluster health, look at the SolidFire Active IQ Dashboard. See [Viewing performance, capacity, and cluster health in SolidFire Active IQ](#).
