Add applications to a Kubernetes cluster 1

Add applications to a Kubernetes cluster

After you create your Kubernetes user cluster, you can easily add any number of applications to the cluster. Using this feature, you gain tremendous efficiency of spinning up or down applications as needed.

About this task

You can deploy applications on the cluster that resides on NetApp HCI by using the NetApp Kubernetes Service.

When you add applications to your Kubernetes cluster, you need to know about storage classes. See [Storage classes with NKS on NetApp HCI](#).

Steps

1. From [NetApp Cloud Central](#), select **Products > NetApp Kubernetes Service**.
2. To add an application to your existing Kubernetes cluster, click **Solutions**.
