Get a NetApp Kubernetes Service API token	1
Steps	1

Get a NetApp Kubernetes Service API token

Enabling cloud services for NetApp HCI requires a NetApp Kubernetes Service API token that is associated with your NetApp Cloud Central account.

You can complete these steps before enabling cloud services or during the process, when a wizard displays a link to get the API token.

Steps

1. Open a web browser and browse to NetApp Cloud Central for NetApp Kubernetes Service.
<https://nks.netapp.io>
2. Log in by providing the NetApp HCI storage cluster administrator credentials.

If you do not have an account, click **Sign Up** and provide the account information.

3. Click **Go to Cloud Data Services** and select **NetApp HCI**.
4. Click the user icon at the top right of the screen and select **Edit Profile**.
5. In the API Tokens section, click **Add Token**, enter a token name, and click **Create**.
6. Copy the token and save it in a file so that you can later paste it when needed.
